

Manhattan Wood Flooring Company since 1988

MANHATTAN WOOD FLOORING CO

Wood Flooring is an investment, it's an art...and it's the heart of every home...

Herringbone is back! Let us transform your home

Wide plank wood flooring was a part of America's foundation — literally. Starting in Colonial times, houses typically had oak, walnut or maple boards that were 4 to 8 inches wide and 6 feet or more in length. Well, the dimensions and designs that worked so well for the settlers 250 years ago are gaining traction with today's discerning remodelers.

The dark brown stains that have been a trend for several years are fading. "We recently took a dark walnut and bleached and custom-stained it to create a vintage, Old World look," Distressed wide planks are trendy and practical: The weathered, textured look has lower-maintenance appeal that's forgiving of nicks and scratches.

Let us help you

- | | |
|-------------------------|--|
| Free Estimate | We will go on-site to view any job and give a free estimate to you – no obligation |
